## COMMERCIAL SLIDING DOOR

**Choice:**

The ENOVATION Commercial 40mm Sliding Door range gives you choices, be it the choice to connect with the outside world, or choose to keep the elements out, utilizing the unique EZI-SEAL Technology.

Suitable for projects including, High End Residential, High Rise Apartments, Commercial, Restaurants and more.

The ENOVATION Commercial Sliding Door allows you to create openings up to 14.4mtr wide by 3 meter high or even 90 degree postless corner units of 7.2mtr each way.

You can really connect with the outside and expand the size of your living space by sliding open all the moveable panels. Even if you wish to close up the doors when the weather turns nasty, you can still enjoy the panoramic views on offer, safe and warm behind the strength and security that the ENOVATION Commercial Sliding Door provides.

Low profile high performance sill with clean lined European aesthetics.

**Performance:**

When water, air, noise and thermal insulation qualities are paramount, the ENOVATION Commercial 40mm Sliding Door provides the performance you need.

Numerous framing options allow for high wind load performance.

Our Ezi Seal Corner Technology allowing the continuous unbroken seals to meet both horizontally and vertically creating a complete seal for better weather sealing and noise reduction performance.

Tested at an independant approved NATA facility, the results proved the Hi-performance features of this Enovative Commercial 40mm Sliding Door System outperforms other Systems on the market.

### **Technology:**

EZI-SLIDE heavy duty dual carriage bogey rollers incorporating new Technology allows for Ezi glide operation of the doors. Dual Precision Bearings per roller, two rollers per assembly parallels the same performance of a four roller carried assembly.

Glazing options from 5mm to 15mm Single Glazed and 25 to 32mm IGU Double Glazed and configurations including two, three, four, six or eight door combinations ensures suitability for any variation of design.

The bi-parting configuration allows the inside panels to slide out of the way allowing for a large open area in the middle of the door.

These sliders are the answer to opening your room and with the 90 Degree Postless Corner application, will give you uninterrupted views to the outside, allowing you to bring the outdoors in.

### **Options:**

A single track option is also available to suit cavity sliding doors that conceals the sliding door sash in the fully open position inside the wall cavity leaving a clear open space.

An option for a Disabled Access Sill Threshold to meet local council requirements but still offering superior weatherability, is available.

Screening sections are available for the Double and Triple Tracks including an inside sliding option.
